

**Wonder  
Technologies**

# We are hunting for

---

## How does it work?

- Wonder Technologies opens a call for components, suppliers respond by submitting proposals for pre-competitive components. R&D groups respond by submitting R&D proposals using one of these components in a research project.

---

## About funding program. OBJECTIVE.

- To develop new products and technologies based on CVD-diamond technology.
- To find new applications for CVD-diamond products.
- To put pre-competitive diamond-based components and systems to industrial partners.
- To facilitate transfer of the R&D results for potential end-users in new markets and new applications.
